

REUSABLE CRANIAL PERFORATORS

ACRA
CUT

Unique selection of perforator models and sizes.

ACRA-CUT SPECIALIZES IN CRANIAL PERFORATORS

ACRA-CUT perforators form a dura-protective bone pad.

Cut-away view of the patented ACRA-CUT release mechanism.

The inner drill cammed-lug shown in the drive position when the perforator is cutting.

The inner drill moved forward by the cam action causes the perforator to stop cutting.

The technology leader in cranial perforators

ACRA-CUT is the only company in the world specializing in the development and manufacture of automatic-releasing cranial perforators. Innovations include perforators for thin skull areas, for uneven bone, and for pediatric procedures. ...And they are available in a wide range of sizes for every surgical application.

UNIQUE BENEFITS

- ACRA-CUT's patented cammed-lug release mechanism, the safest and most reliable ever developed, eliminates the risk of dangerous penetration.
- Inner drill moves forward less than 1mm to automatically release.
- Sharp edges cut quickly and smoothly so less hand pressure is required.
- Will not stop drilling before the burr hole is completed. Can be stopped and started as the surgeon requires.
- Non-skid tip prevents the perforator from sliding on the skull during start-up.
- Inner drill forms a bone pad to help protect the dura.
- Rigorous testing makes ACRA-CUT perforators the safest in the world. Each reusable perforator drills 21 holes in pretesting.
- Several models are offered in 14mm/11mm and 11mm/7mm sizes.
- Easy and risk-free assembly. Perforator cannot be assembled incorrectly. Parts are serialized for easy identification.

Each perforator is shown below with the actual burr hole size it drills.

ACRA-CUT REUSABLE CRANIAL PERFORATORS

200-141 DGR-I
14mm/11mm

DGR-I

- For use in skulls/skull areas at least 3mm thick known to have uneven bone.
- Cutting edges can form a small, unattached bone pad.

CATALOG NO.	SIZE
200-141	14mm/11mm

200-151 DGR-II
14mm/11mm

DGR-II

- For use in skulls/skull areas as thin as 1mm known to have uneven bone.
- Cutting edges can form a small, unattached bone pad.

200-152 DGR-II
11mm/7mm

CATALOG NO.	SIZE
200-151	14mm/11mm
200-152	11mm/7mm

200-171 DGR-O
14mm/11mm

DGR-O

- For use in skulls/skull areas at least 3mm thick known to have excessive uneven bone.
- Cutting edges form a very small, unattached bone pad.

CATALOG NO.	SIZE
200-171	14mm/11mm

ACRA-CUT reusable cranial perforators come with a protective sterilizing/storage case.

Other ACRA-CUT Products

ACRA-CUT products:

- (a) 800-140 Spiral Flute Cranioblade
- (b) 800-130 Straight Flute Cranioblade
- (c) 800-330 Wire Pass Drill
- (d) 200-271 DGR-O 14mm/11mm Disposable Perforator

ACRA-CUT Spiral Cranioblade A Revolution in Cranioblade Performance

ACRA-CUT Spiral Flute Cranioblades:

- (a) 800-240 Replaces MIDAS REX® B-1
- (b) 800-241 Replaces MIDAS REX® S4-218
- (c) 800-250 Replaces Stryker® D-1 & Hall® Surgical 7021-815
- (d) 800-260 Replaces ANSPACH® GRE-1

Cost-saving craniotomy kit contains individually packaged, sterile cranial perforator, cranioblade, and wire pass drill.

Reusable ACRAGUN with preloaded sterile disposable cartridge.
ACRACLIP – Choice of clamping force and jaw design.

Contact ACRA-CUT:

- To arrange a product trial.
- To place an order.
- For additional information on our complete range of cranial perforators, cutting tools and other instruments.
