ACRA
CUT®

*The ACRA-CUT distraction screw
has a unique self-tapping tip design
for easier insertion.*

ACRA-CUT DISPOSABLE DISTRACTION SCREWS FOR ACF PROCEDURES

ACRA-CUT manufactures disposable distraction screws with the same precision and exacting tolerances as its cranial perforators. This means that the surgeon can have complete confidence in their quality, safety and performance when using them with any vertebral body distractor for anterior cervical fusion.

UNIQUE BENEFITS

Compatible with all ACF systems.

- Each distraction screw is prepackaged, sterile, ready-to-use, in its own blister-pack.
- 100% stronger than other distraction screws.
- Unique sharp, self-tapping tip design for easier insertion.
- Sold individually or in a convenient 10-pack.
- Manufactured by ACRA-CUT, Inc.
- Always in stock, never on back order.
